

Extra training makes extraordinary doctors.

OrthopaedicsNorthEast doctors don't just settle for a medical degree and residency. They go on for a year-long fellowship to specialize in a specific area of the body. When you come to them for treatment, you know you're getting the best treatment medicine offers.

Our extraordinary doctors excel in healing bones, joints, spines, and sports injuries. And while advanced training makes **ONE** doctors the ones to treat complex cases, it also makes us naturals at curing routine injuries.
