

Pro Systems (PS) Video Script

Draft 06 FINAL Approximately 4 minutes.

Music under entire video

Voiceover (VO), male, throughout script with appropriate images—either video or still—of PS, its people, and its products:

Pro Systems is an industry leader in the design and build of automated machines and systems for the plastics industry. In the world of plastics manufacturing, Pro Systems can provide the equipment you need to stay competitive with anyone in the world. From up stream value-added processes before the molding machine, to down stream automation, and all the way through packaging, Pro Systems is your source for automated molding equipment. But don't just take our word for it, we want you to hear from our customers, too.

Music continues with CG, probably white text on black background but customer quotes that appear throughout the video may also appear over “scaled back” images. Woman voice talent to read quotes.

“Pro Systems is willing to look down different avenues and explore new technology.” — Customer Satisfaction Survey 2005

Quickly moving, animated CG that begins slightly before the VO resumes:
“Plastics” in the middle with the following emerging from **“Plastics”**: **“pharmaceutical, medical, electronics, industrial, automotive”**

VO

At Pro Systems, we serve many segments of the plastics industry by combining proven methods with new technology to develop leading-edge custom automation.

Images of staff at work while the following VO is heard:

Our team of professionals brings a wealth of technological experience to your project. Our salespeople, engineers, machinists, assemblers, and support staff provide solutions to complex manufacturing processes by creating automated machines and systems to meet your specific challenges.

VO with image of screen capture from project management software:

Project management is the foundation of any successful automation project. From the beginning to the end, our experienced management team ensures that the defined scope of the job is completed to the satisfaction of every customer.

Music continues with CG: **“Pro Systems is customer focused, solution oriented, and easy to work with.” — Customer Satisfaction Survey 2005**

VO with map showing where on in North America PS machines are in use:

The Pro Systems philosophy results in automated systems of the highest quality that are in use throughout North America. We foster professional conduct in a positive environment and we are committed to strong customer and vendor relationships.

Music continues with CG: **“Foreign competition is increasing, so the playing field is not level. Pro Systems helps by providing a better way to produce parts and satisfy customer requirements.” — Customer Satisfaction Survey 2005**

VO:

From a simple insert molding machine to complex automation before and after the molding process, Pro Systems can design and build the equipment you need. Our pre- and post-molding processes include but are not limited to:

CG with possible VO and possible appropriate images of pre-mold and post-mold, although CG may be better to appear on screen alone as list or over scaled back images.

VO

Pro Systems excels when faced with a unique manufacturing task by thinking outside the box to engineer a solution specially suited to the application.

Music continues with CG: **“Pro Systems has the ability to conceptualize new ideas and solutions.” — Customer Satisfaction Survey 2005**

Music continues with CG: **“They are full of creative, functional designs.” — Customer Satisfaction Survey 2005**

Wayne appears on camera, identified as the Owner, although an ID of CEO or President is preferable.

In the complex world of automated machines and systems, we understand that you are faced with many challenges when choosing the right company. Pro Systems was founded on the following principle: “Those who are willing to believe in something better and then commit to making those ideas become reality, set themselves apart from their competitors.”

Our commitment to you is that we will never stray from our foundation and if and when problems do arise, we will be there to support you and service your needs. Our basic goals have always been firstly to expand our capabilities by pushing ourselves technically and looking outside the box in each project and secondly, simply to do what is right in all aspects of our business.

We welcome the opportunity to explore how our commitment to the industry and to our customers can solve your specific automation requirements.

Music continues with CG: **“Great reputation for quality and ingenuity.” — Customer Satisfaction Survey 2005**

Music continues with CG: **“Pro Systems is a quality operation, a premier machine builder.” — Customer Satisfaction Survey 2005**

Contact information appears as CG.
Fade to black as music comes to an end.

PS logo appears with the following CG:
Pro Systems is an ISO 9001:2000 company.

Fade to black and out.
